Data Collection & Progress Monitoring Using Cottage Acquisition Scales for Listening, Language and Speech (CASLLS)

Description:

The Cottage Acquisition Scales for Listening, Language and Speech (CASLLS) is a tracking tool based on typical development of spoken language designed for children who are deaf and hard of hearing. While basic training on this tool is offered in our state, a more in-depth study of how to collect, chart and analyze data using the new electronic version of CASLLs will be provided. This is especially important in supporting Teachers of the Deaf and Hard of Hearing to report yearly legislative mandated student literacy and language outcomes.
